

Arco Hard Hat Challenge

Let your imagination run wild as you join local safety company Arco as a designer to create a new hard hat.

Prep (you will need)

-  Coloured pens
-  Glitter
-  Glue
-  Paint
-  Ribbon, beads, sequins etc
-  Your imagination

Props (we have provided)

- ◆ Hard hat template

GO FOR IT!

- 1 Carefully cut out the four hard hat pieces from the template provided, ask a teacher to help you with tricky parts.
- 2 Use coloured pens, paint and crafts to decorate the pieces. The more creative the better – let your imagination go wild.
- 3 When you have finished your design (if you've used paint or glue, make sure it's dry) assemble the four pieces together to create your hat.
- 4 Fold the tabs down and use glue to stick the parts together. Ask your teacher to help if you're stuck.
- 5 Start by sticking parts 1 and 2 together so that both blue lines come together, then stick 3 to make the side, add 4 to the opposite side and finally add 5 – your hard hat should now have been constructed.
- 6 Hold a class or school competition to select a winner of the hard hat competition. Take a picture of the chosen entry and upload it to Digitull (digitull.co.uk).
- 7 Keep hold of your winning entry – Arco will choose one to make into a real hard hat, how cool is that?
